Attention: John Burvainis, Acting Director
Public Service Commission
PO Box 94927
Lincoln, NE 68509-4927

RE: Docket No. NG-0051 / PI 130

Dear Mr. Burvainis,

This letter is to serve as support for Nebraska Resource Co.'s proposed natural gas pipeline from Clay County to Columbus, NE. Central Bio Energy, LLC is developing ethanol plants in St. Paul, NE and Utica, NE and will be utilizing Nebraska Resource Co.'s pipeline to provide gas to our plants.

Nebraska Resource Co. is providing us with an economically valuable alternative to the other natural gas pipelines currently in our area. Their investment in this project will help us create more than 50 permanent jobs and over 175 construction jobs with a financial impact of over \$200 million annually per site.

We strongly request your approval of this pipeline and see this as a valuable resource for our company as well as the thousands of consumer agricultural and business natural gas users that could potentially gain access to this pipeline.

Sincerely,

Gordon Glade
President
Central Bio Energy, LLC
